Professional Profile

Result-oriented & innovative Front-End Developer with experience blending the art of design with the skill of programming to deliver an immersive and engaging user experience through efficient website development, proactive feature optimization, & relentless debugging. Develops with the latest tools in web technology to produce online applications for creative experiences which are constantly evolving. Proficient in developing front-end systems with JavaScript, HTML5, CSS3 & JavaScript frameworks. Demonstrates a high level of motivation independently & with others to meet the tightest deadlines. Recognized for professionalism, resourcefulness, & exceptional time management.

Career Summary

👤 IT Frontend Developer   Jan 2022 – present

💼 Mira Technologies Ikeja Lagos

RESPONSIBILITIES

- Create stunning visual elements of web applications by translating UI/UX design wireframes into code while producing high-quality, reusable markup using HTML5, CSS3, JavaScript, and Reactjs
- Built and maintained the user-interface of a web application used by the company's affiliates to manage and track their progress
- Expand features, refine code, and improve processes, producing smoother operations & enhancing user engagement
- Manage website development projects from initial design through completion, optimizing all cross-browser and multi-platform compatibility
- Implement and maintain user-friendly user-interface of the internal tools used by the company to manage business and accounts.

Education

👤 Bachelor of Science– Geography   First Class   **2022**

🏛 Osun State University

Project

💼 Mira Hpro

- Mira HPro is an Enterprise Hospital Management System (EHMS). It is a web application that can run across multiple platforms. The System is designed to provide the best user experience and also provide the hospital with the capability to manage out-patients, in-patients, diagnostics, process inventory, accounts, consultation, dispense drugs and manage personnel.

  With the assistance of Mira HPro, hospitals, clinics, laboratories and other medical institutions can digitally access and process centrally integrated patient data.
- Implemented enhancements that improved web functionality and responsiveness
- Managed deployment processes for production code out to local server environments
- Styled pages with CSS3.0 and developed JavaScript for user interfaces
- Establish a REST API for creating and fetching of reports.

💼 Microfinance Bank

- Business Operation software designed for savings and property account handling as well as loans and many other staff activity tracking features developed with vanilla JavaScript
- Styled pages with CSS3.0 and developed JavaScript for user interfaces
- Implemented charts using the fusion chart library by transforming user information to fit the data needs of the fusion chart
